

MATRIX Agents — Full Technical Report (FR/EN)

Generated: 2026-10-02 14:25 Europe/Paris · Scope: all registered agents/models in D:\MTP-CENTRALE

FR : Rapport complet agent par agent (provider, runtime, statut réel, réaction observée, citation).
EN : Full per-agent report (provider, runtime, live status, observed reaction, notable quote).

Light humor mode: highly technical document, but still human-friendly. If a model stayed silent, we call it "professional meditation" 🧘.
