

Montpellier ECU

Born in Occitania.
Designed to be used worldwide.

Investor Deck 2026

Every abandoned screen still holds value.

But the idea goes much further.

Forgotten value is everywhere.

Not only in objects — also in skills, time and people.

Objects

Reusable, repairable, valuable again.

Skills

Knowledge that remains underused.

Time

Useful work waiting to circulate.

People

Communities that need better tools.

Montpellier ECU reconnects forgotten value through a community economy.

WHY NOW?

The moment for local digital currencies is returning.

- 01 Community currencies are becoming relevant again.
- 02 Base enables low-cost payments.
- 03 Local economies need better tools.
- 04 Montpellier ECU is designed as a model any city can adopt.

A community currency for everyday life

Real uses, small transactions, local value.

Buy daily bread

Pay one hour of
gardening

Hire an IT technician

Buy a second-hand
bicycle

Pay for tutoring

Support local artists

Born in Occitania.

Designed to be used worldwide.

Montpellier ECU begins in Montpellier and grows from Occitan values: local identity, solidarity, practical exchange and community participation.

The model is local by origin, but replicable by design.

Why Base?

Blockchain is not the product — it is the infrastructure.

BASE

Powered by Base

Fast

Low-friction transactions for everyday exchanges.

Low fees

Affordable for small payments and local services.

Global

Usable beyond one city or one region.

Open

A public ecosystem where anyone can build and verify.

How MTP works

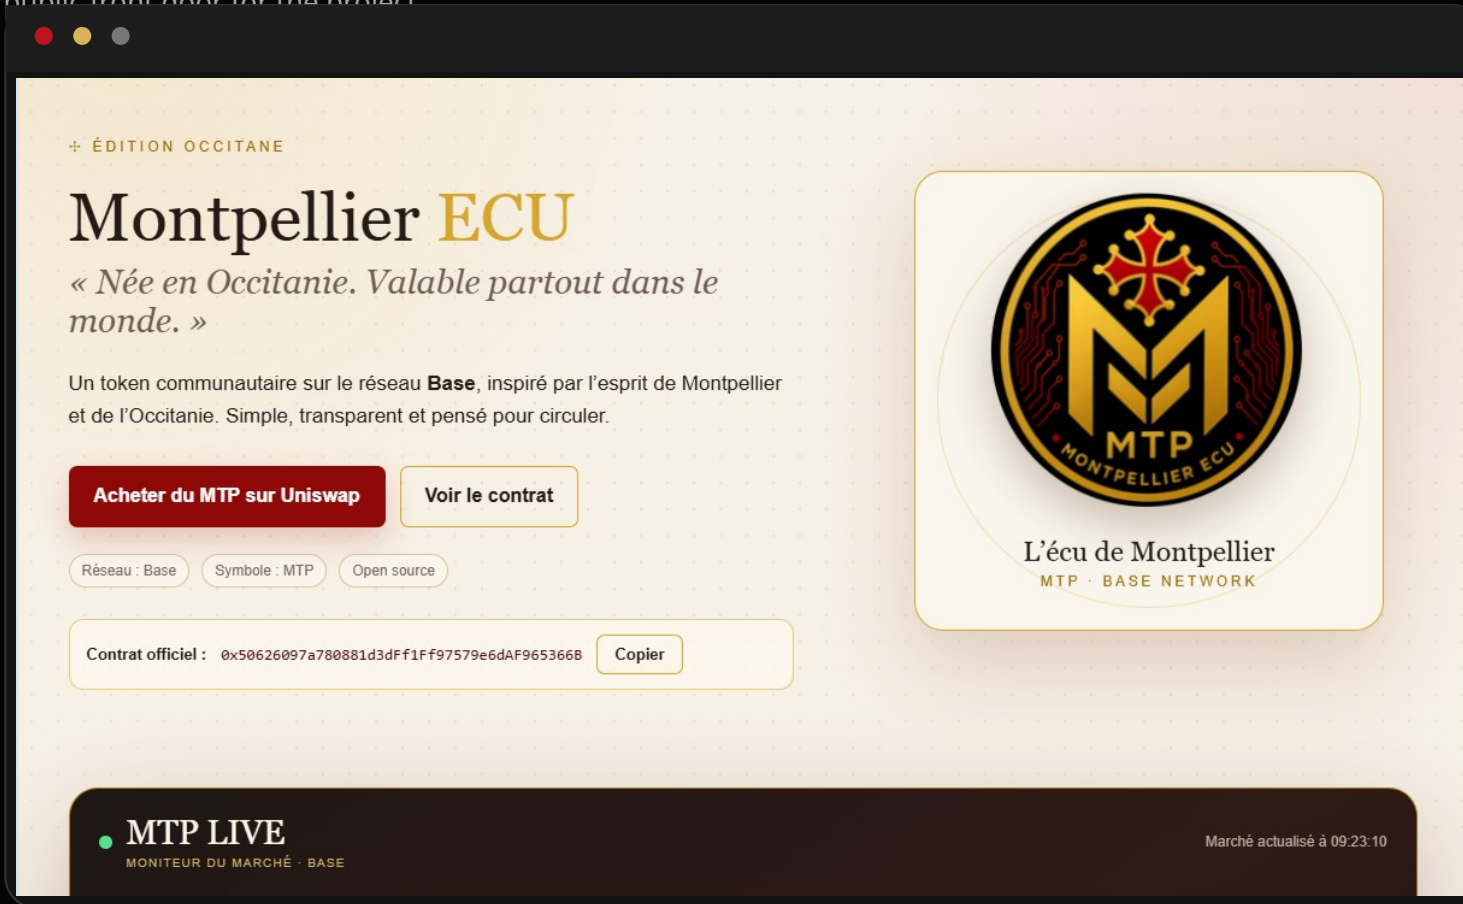

A simple loop for real-world value circulation.

The currency stays inside the community. Everyone benefits.

Official website

A public front door for the project

Holders in snapshot

Supply & holders snapshot

Early-stage token distribution on Base.

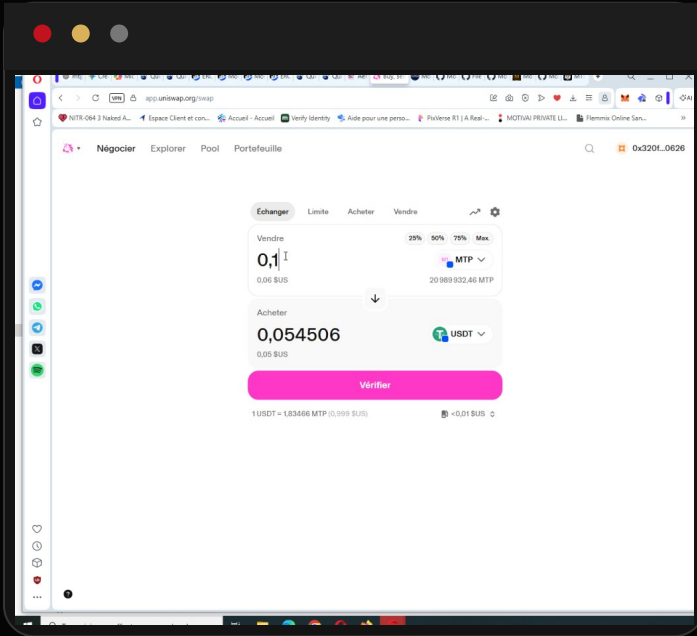

Early stage

The project is in its earliest phase. This deck clearly distinguishes current traction from future adoption goals.

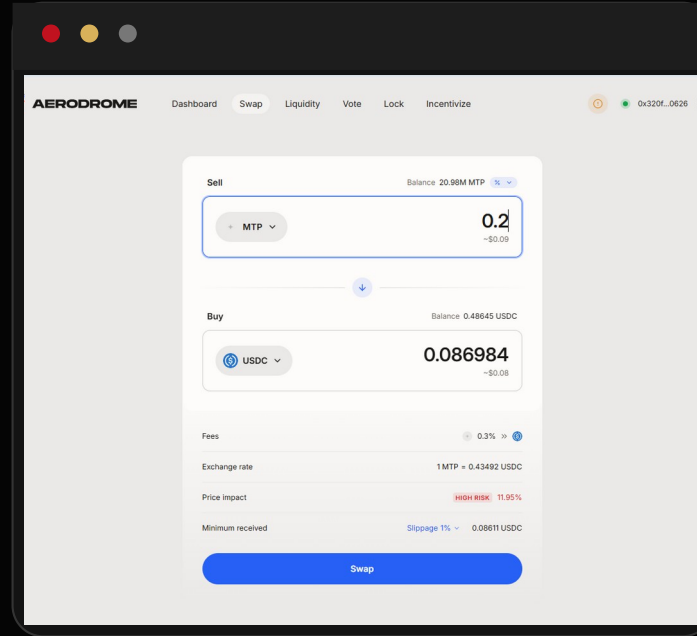

Liquidity routes already live

MTP is accessible through multiple DEX interfaces on Base.

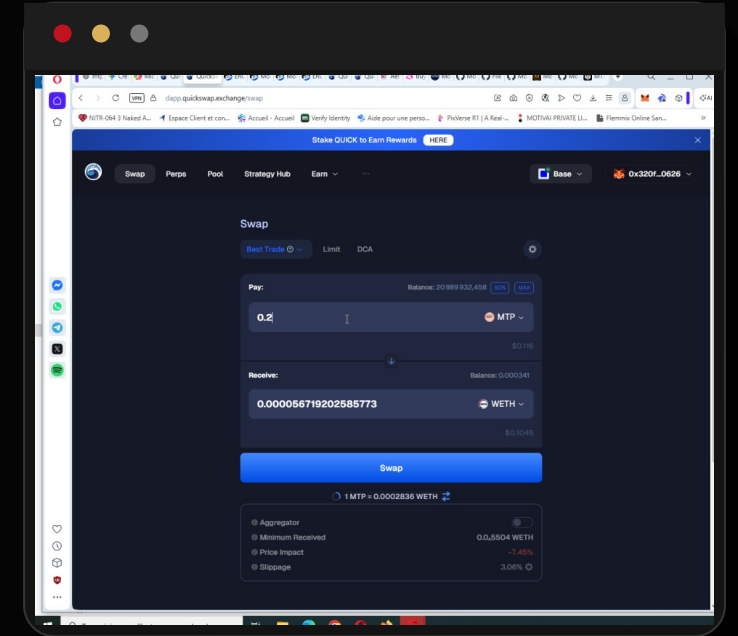

Uniswap

MTP / USDT

Aerodrome

MTP / USDC

QuickSwap

MTP / WETH

Liquidity is early and intentionally presented as a funding priority: deepen markets and make everyday swaps more reliable.

Utility

Payments for services, goods and local exchanges

Liquidity

DEX pools and public sale distribution

Community

Designed around participation and adoption

Future

Community reward mechanisms inspired by mining

Future functionality will be developed only as funding, adoption and compliance allow.

Roadmap

From Montpellier pilot to a replicable community currency model.

NOW

Live token, website,
documentation, public sale and
DEX routes.

6 MONTHS

Deepen liquidity, improve
communications, onboard first
real use cases.

12 MONTHS

Merchant pilot in Montpellier and
broader Occitania awareness.

24 MONTHS

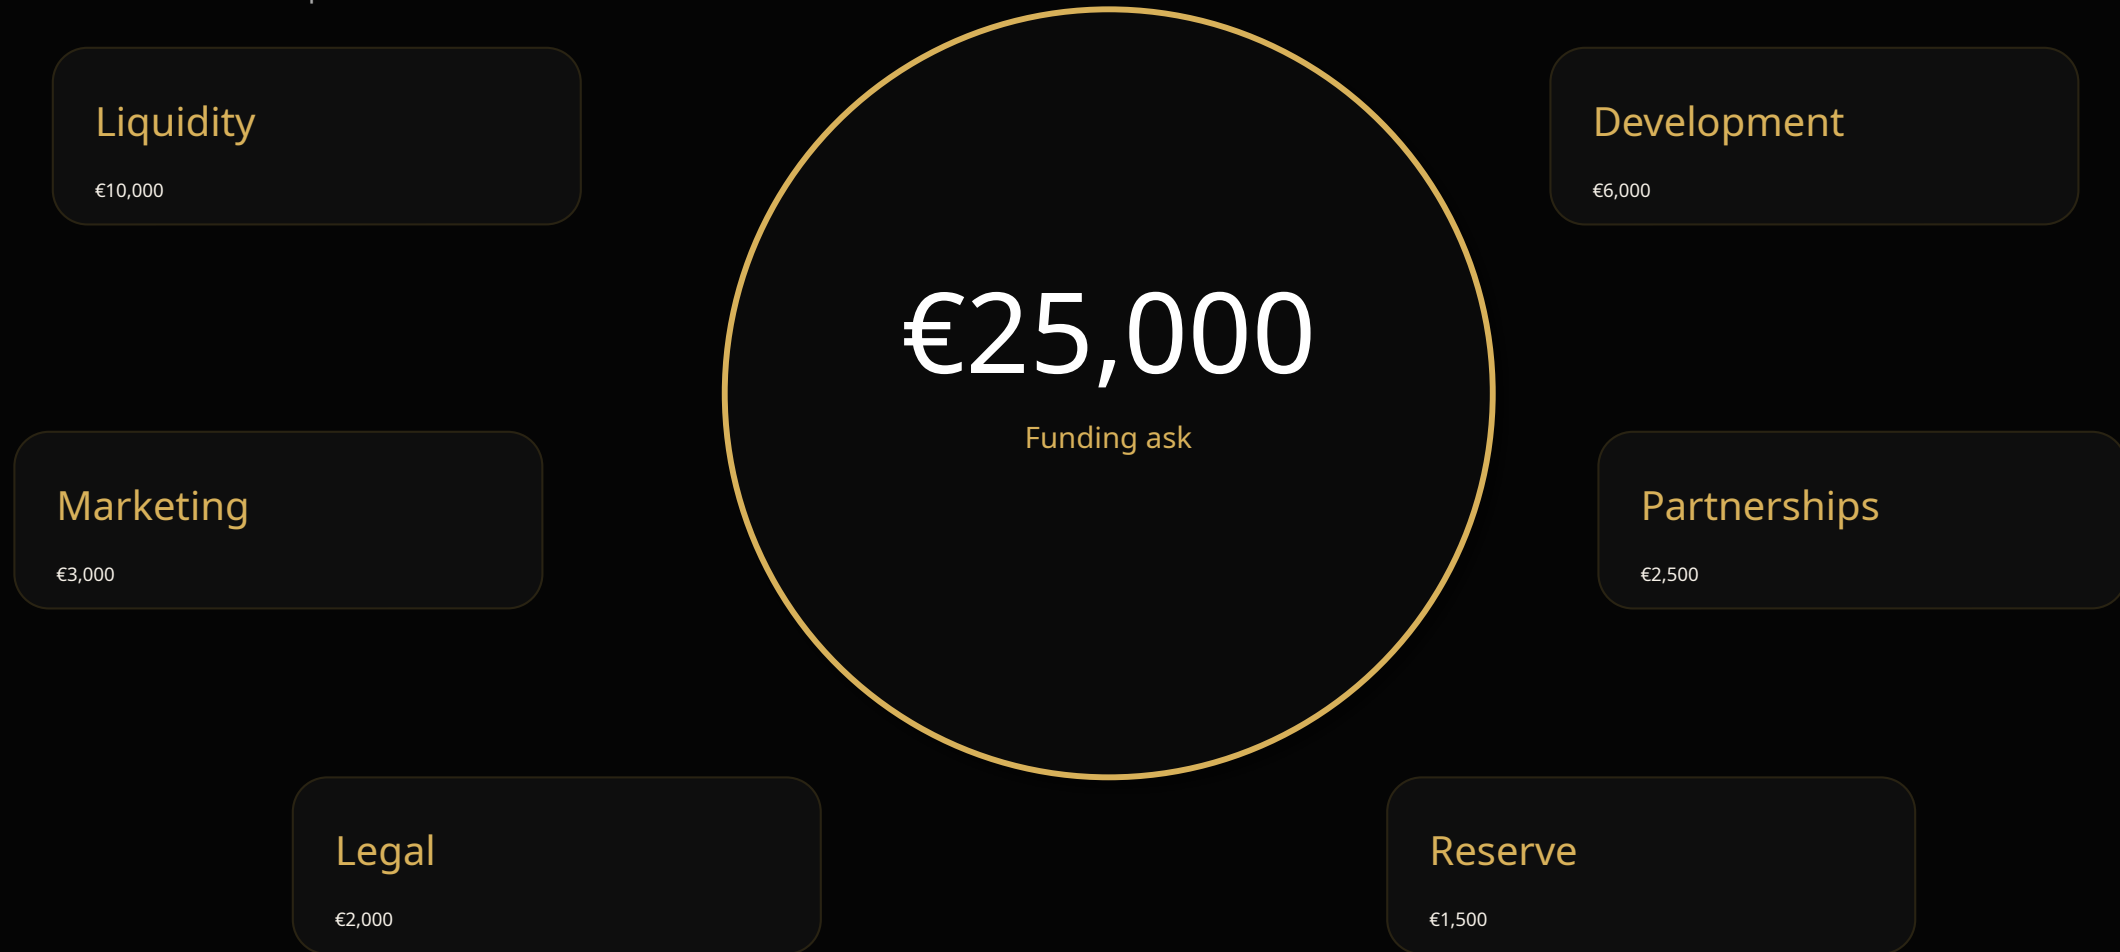

Replicable model for other cities
and communities.

Prove local value first. Then expand.

Funding request

A focused ask for the next phase.

We are not asking Base to finance a token. We are asking Base to help build the first community digital currency born in Occitania and designed for everyday use.

Founder

A technical founder with a local mission.

Mehdi Souissi

Founder & Project Lead

Montpellier ECU is rooted in a personal conviction: local value already exists, but needs better tools to circulate. Born in Montpellier, the project is built around Occitan identity, digital inclusion and practical exchange.

Founder

Montpellier ECU (MTP)

Technical background

IT support and technical services

Mission

Digital inclusion and practical exchange

Every community already owns forgotten value.

Montpellier is only the beginning.
